This letter is for a field inspection conducted on July 23, 2024, for the Insulation at the above reference residence. There was no problem here except that the construction company did not request the inspection in a timely manner. I requested for drywall to be cut out on walls in order for me to observe the work that was done. All work was found to be in accordance with the 2020 Florida Building Code, 7th Edition, 170 MPH Ult., to include the Residential and Existing Building Codes. I, J.C. Kosinski Engineering Inc, take full responsibility for these inspections.

This certification shall cover the following inspections:

Wall Insulation

This inspection is intended for and limited only to the above referenced items. Conditions not observed or visible may be present that affect the integrity of the system.

If you should have any questions, please call.

Sincerely,  
J.C. Kosinski Engineering Inc.
